

Pre-reserved bend for cable entry into distribution box

Overview

A cable gland plate, also known as a gland plate or entry plate, is a flat metal plate that provides a secure interface for cable glands to enter and exit an enclosure. Cable glands protect electrical components from mechanical stress such as bending and. The portfolio features sealed entrance points for cables and maintains high ingress protection ratings – IP54 and IP66 – against dust, water and. Using icotek's patented grommet-based cable entry system, a wide range of pre-terminated cables (up to 65 mm in diameter) and cables without connectors (up to 75 mm in diameter) can be quickly routed into enclosures, control panels or machines and sealed to provide up to IP66/UL Type 4X* protection. Id's most innovative and flexible cable and pipe transits. Standardize with Roxtec penetration seals in di pecification of cable entry seals be a field-based decision. Include it in the design and engineering s ope to ensure safety and r o use – from the power generation through to distribution. Larger diameter ducts shall only be used in si uations where the route is unusually tortuo be installed in touching trefoil arrangement.
