

# Price of Composite Cable Tray Dedicated Line

## AI Overview

Composite cable trays typically range from \$20 to \$150 per meter, depending on material, size, load capacity, and customization options.

**Pricing Overview**

The cost of composite cable trays, such as fiberglass-reinforced plastic (FRP/GRP) trays, depends on several factors:

- Material and Coating:** FRP/GRP composites are corrosion-resistant and lightweight, which can increase the price compared to standard galvanized steel trays.
- Dimensions:** Widths, heights, and lengths affect the price. Standard lengths are usually 1–3 meters, with widths ranging from 50mm to 600mm.
- Load Capacity:** Trays designed for heavy-duty or high-load applications cost more due to reinforced structures.
- Customization:** OEM or factory-direct options, including specific slot patterns, bends, and accessories, can influence pricing.
- Volume Discounts:** Purchasing in bulk often reduces the per-meter cost, especially from direct manufacturers.

**Typical Price Range**

- Light-duty composite trays: \$20–\$40 per meter
- Medium-duty composite trays: \$50–\$90 per meter
- Heavy-duty or specialized trays: \$100–\$150 per meter

These prices may vary based on supplier location, shipping costs, and additional fittings such as couplers, bends, and brackets.

**Sourcing Tips**

- Factory-direct suppliers:** Offer competitive pricing and customization options.
- B2B marketplaces:** Platforms like Tradewheel or Made-in-China provide access to multiple manufacturers and allow for price comparison.
- Consider total cost:** Include installation efficiency, long-term durability, and maintenance when evaluating cost-effectiveness.

By considering these factors, you can select a cost-efficient composite cable tray solution tailored to your dedicated line requirements.
