

Price of Trough-Type Cable Trays from Major Manufacturers

AI Overview

Trough-type cable trays typically range from \$20 to \$150 per meter, depending on material, finish, and accessories.

Factors Affecting Price

Material: The choice of material significantly impacts cost.

- Hot-dip galvanized steel:** Economical, suitable for most industrial applications, generally the lowest cost option.
- Stainless steel (304, 316):** Premium option with superior corrosion resistance, ideal for harsh or chemical environments, more expensive.
- Aluminum:** Lightweight, corrosion-resistant, non-magnetic, often used in data centers or telecom, moderately priced.

Finish and Coating: Additional coatings like powder coating or fireproof finishes increase the price.

Manufacturing Process: Trays from manufacturers with advanced automation may offer better consistency and competitive pricing due to efficient production.

Accessories: Fittings, bends, tees, reducers, and splices add to the overall system cost.

Size and Load Capacity: Wider or deeper trays designed for heavier cable loads cost more. Custom dimensions or high-strength designs increase the price.

Typical Price Range

- Standard galvanized steel trays:** Approximately \$20–\$50 per meter.
- Aluminum trays:** Around \$40–\$80 per meter.
- Stainless steel trays:** \$80–\$150 per meter, depending on grade and finish.

For large-scale projects or specialized environments, prices can vary further, and bulk orders may reduce per-meter costs. It is recommended to request quotes from multiple suppliers to get accurate pricing for your specific requirements.

Summary

The cost of trough-type cable trays is influenced by material, finish, manufacturing quality, accessories, and size. Hot-dip galvanized steel is the most cost-effective, while stainless steel provides premium durability. Aluminum offers a balance of weight and corrosion resistance. Always consult suppliers for precise quotes tailored to your project.
