

Price of a standard electrical distribution box

AI Overview

A standard residential electrical distribution box typically costs between \$25 and \$200, with total installed costs ranging from \$75 to \$300 depending on material, labor, and installation complexity.

Typical Costs

- Plastic or non-metallic boxes: \$6–\$25 for a single-gang unit, commonly used indoors with standard wiring.
- Metal boxes: \$4–\$12 for standard interior 2-gang boxes; outdoor or weatherproof metal boxes can cost \$15–\$40 or more.
- Labor: Installation usually adds \$75–\$150 for straightforward indoor setups, with higher rates in metro areas or for complex wiring.

Factors Affecting Price

- Material:** Plastic boxes are cheaper and easier to install, while metal boxes offer durability and grounding benefits.
- Size and Gang Count:** Single-gang boxes are the least expensive; multi-gang or deeper boxes increase material and labor costs.
- Location:** Outdoor or weatherproof boxes require additional materials and labor, raising the total cost.
- Amperage and Panel Type:** Standard 100–200 amp panels are less expensive than 400 amp or specialty panels.
- Permits and Upgrades:** Local permit requirements or upgrades to wiring can add to the total project cost.

Budgeting Tips

- For a basic indoor replacement, expect \$75–\$150 total including labor.
- For upgraded metal or weatherproof boxes, total costs can reach \$150–\$300.
- Request itemized quotes to separate materials, labor, and permits, and consider reusing existing openings to reduce costs.

By considering these factors, you can select a standard electrical distribution box that fits your budget while meeting safety and code requirements.
