

Price of wall mounting for distribution boxes

AI Overview

The price of wall-mounted distribution boxes typically ranges from \$30 to \$500 or more per unit, depending on size, material, IP rating, and customization options.

Factors Affecting Price

- Size and Capacity:** Small residential boxes are generally less expensive, while larger commercial or industrial panels with multiple circuits cost more.
- Material:** Steel, stainless steel, aluminium, and high-grade plastics affect durability and price. Stainless steel or IP67-rated enclosures for outdoor or marine use are at the higher end.
- IP Rating:** Higher IP ratings (e.g., IP65, IP67) for dust and water protection increase cost.
- Customization:** OEM branding, modular designs, busbar modifications, and transparent doors can raise the price.
- Order Volume:** Wholesale or bulk orders often reduce per-unit cost, while single units or custom orders are more expensive.

Typical Price Ranges

- Small residential boxes: \$30–\$100 per unit
- Medium commercial boxes: \$100–\$250 per unit
- Large industrial or IP-rated boxes: \$250–\$500+ per unit

Additional Considerations

- Installation:** Wall mounting should be performed by a licensed electrician to comply with local electrical codes (NEC, IEC, or BS 7671) and may add \$50–\$150 depending on complexity.
- Delivery:** Many suppliers offer next-day shipping for stock items, but custom or large orders may take longer.
- Maintenance:** Regular inspection, thermal imaging, and terminal tightening can extend the life of the distribution box.

For precise pricing, it is recommended to contact suppliers directly with your specifications, including size, material, IP rating, and quantity, to obtain a tailored quote. Suppliers like Alibaba, RS Components, and Made-in-China provide both stock and customizable options.
