

Price quote for original optical fiber cable reels

AI Overview

The cost of an original optical fiber cable reel typically ranges from \$100 to over \$1,000 depending on material, size, and capacity. Price Ranges by Material and Type

Plastic reels: Lightweight and cost-effective, usually priced between \$100 and \$300. Ideal for short-term deployments or indoor use, these reels are made from high-impact polystyrene or polypropylene and are suitable for small-scale installations.

Wooden reels: Constructed from laminated plywood or hardwood, these reels offer better strength and shock absorption. Prices generally range from \$200 to \$600, depending on size and fiber capacity. They are commonly used for long-haul or outdoor fiber deployments.

Metal reels: Made from steel or aluminum, metal reels are the most durable and suitable for high-tension or repeated-use applications. Costs can exceed \$500 to \$1,200 or more, reflecting their rugged construction and suitability for industrial environments.

Factors Affecting Cost

Reel Size and Capacity: Larger reels that hold several kilometers of fiber cost more due to increased material and manufacturing complexity. Standard flange diameters include 24", 36", and 48", with larger reels accommodating longer cable runs.

Fiber Type and Pre-Termination: Reels designed for single-mode or multi-mode fibers, or pre-terminated assemblies, may be more expensive due to precision handling and protective features.

Additional Features: Reels with removable lids, manual cranks, or high-tension support systems increase usability but also raise the price.

Bulk Orders: Purchasing multiple reels in bulk can reduce the per-unit cost, especially from suppliers like Alibaba or specialized distributors.

Summary

For a standard original optical fiber cable reel, expect to pay \$100–\$300 for plastic, \$200–\$600 for wooden, and \$500–\$1,200+ for metal reels, with prices influenced by size, fiber type, and additional features. For precise pricing...
