

Pricing Table for Low-Voltage Distribution Boxes

AI Overview

Low-voltage distribution boxes typically range from \$50 to \$500 for standard residential units, with commercial and industrial models costing significantly more depending on specifications and features.

Price Range Overview

Residential Units: Basic single-phase low-voltage distribution boxes generally cost \$50 to \$150, while more advanced three-phase residential units with multiple circuits and integrated safety devices can range from \$150 to \$500.

Commercial and Industrial Units: Prices increase due to higher durability, larger capacity, and advanced features such as smart monitoring, remote control, and weather-resistant enclosures. These units can range from \$500 to several thousand dollars depending on amperage, number of circuits, and customization.

Wholesale and Bulk Orders: Purchasing in bulk or through distributors can reduce per-unit costs, especially for standard models without extensive customization.

Factors Affecting Cost

Voltage and Amperage Ratings: Higher voltage or current capacity increases material and component costs.

Number of Circuits: Multi-circuit boxes are more expensive due to additional breakers and busbars.

Material and Construction: Metal enclosures, corrosion-resistant coatings, and high-grade insulation raise prices compared to basic plastic units.

Indoor vs Outdoor Use: Weather-resistant outdoor boxes carry a premium for UV protection, moisture sealing, and temperature tolerance.

Integrated Features: RCD/RCCB protection, surge arresters, modular design, and smart monitoring systems add to the cost.

Customization: OEM branding, specific mounting configurations, or specialized labeling can increase the price.

Practical Considerations

Installation: Professional installation may be required for complex or high-capacity units, adding to overall cost.

Long-Term Value: Investing in high-quality, durable distribution boxes...
