

Protection accessories for high and low voltage complete sets of equipment

Overview

Electrical Safety Equipment: Comprehensive Guide for LV, MV, and HV Systems is your single, practical map for planning, buying, using, and maintaining safety gear across low, medium, and high-voltage environments. Our high and low voltage complete electrical equipment solutions are designed based on a deep understanding of the current development trends in the power industry and accurate predictions of future power demand. We'll link risks to controls, explain what each piece of equipment actually does, and. → View below our ranges of Electrical Safety Equipment for working on Underground Cables and Overhead Lines at low, medium and high voltages - we are the largest UK stockist of CATU Electrical Safety Equipment & Products for working at LV, 600v 11kV, 33kV, 66kV, 132kV and up to EHV 400kV. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems.
