

Reference Price for Tray-Type Cable Trays in Vietnam

AI Overview

Cable tray systems in Vietnam typically cost between \$10 to \$50 per meter, depending on material, type, and specifications.

Cost Overview The price of a cable tray system in Vietnam varies widely based on material, type, size, and manufacturer. Common materials include galvanized steel, stainless steel, and FRP (fiber-reinforced plastic), with galvanized steel being the most economical and stainless steel or FRP costing more due to durability and corrosion resistance. Typical types include ladder, perforated, and trough trays, with ladder trays generally being more expensive due to higher material usage and structural strength.

Galvanized steel ladder tray: \$15–\$30 per meter
Stainless steel tray: \$30–\$50 per meter
Perforated or trough tray (galvanized): \$10–\$25 per meter

Factors Affecting Cost

- Material and Coating:** Powder-coated or hot-dip galvanized trays are more resistant to corrosion, slightly increasing the price.
- Size and Load Capacity:** Wider trays or those designed for heavy-duty industrial use cost more. Standard widths range from 50mm to 4000mm.
- Manufacturer and Brand:** Local manufacturers like Viet A, Phuc Long Intech, Bach Khoa Viet Nam, and HABT offer competitive pricing, often lower than imported options while meeting ISO and IEC standards.
- Accessories and Installation:** Fittings, bends, supports, and installation services can add 20–40% to the base material cost.

Recommendations For budget-conscious projects, galvanized steel perforated trays from local suppliers like Phuc Long Intech or Bach Khoa Viet Nam provide a balance of quality and affordability. For high-corrosion or industrial environments, stainless steel or FRP trays are recommended despite higher costs. Always verify certifications such as ISO 9001:2015, IEC, and NEMA VE1 to ensure compliance and safety. By considering these factors, project planners in Vie...
