

Supply Price of 10 Gigabit Multimode Optical Modules

AI Overview

The supply cost of 10G multimode SFP+ optical modules typically ranges from \$50 to \$200 per module, depending on brand, fiber type, and transmission distance.

Pricing Overview The cost of a 10G SFP+ multimode module varies widely based on brand, compatibility, and optical specifications. In general, modules for standard enterprise and data center use fall within \$50 to \$200 per unit, while premium or OEM-certified modules from vendors like Cisco may reach \$300 or more. Lower-cost third-party modules are available but may have limited warranty or compatibility assurances.

Factors Affecting Cost

- Transmission Distance:** Short-range (SR) multimode modules for OM3 fiber typically support up to 300 meters, while OM4 modules can extend up to 400 meters, influencing price.
- Brand and Certification:** Cisco, HP, and Brocade certified modules are generally more expensive due to guaranteed interoperability and quality testing.
- Optical Technology:** Modules using advanced digital optical monitoring or multi-rate support may cost more.
- Form Factor:** SFP+ modules are compact and hot-swappable, which adds value for high-density deployments.

Example Products

- Cisco 10GBASE-SR SFP+:** Supports OM3 fiber up to 300m and OM4 up to 400m, priced around \$150–\$250 depending on vendor and certification.
- Amphenol 10GBASE-SR SFP+:** Multi-rate, low power consumption (
