

Surface-mounted panel of distribution box

Overview

Surface mounted distribution boards are installed directly onto wall surfaces, protruding from the mounting surface. This installation method offers several advantages including simplified installation procedures, enhanced accessibility for maintenance, and easier cable management. A panelboard services to protect branch circuits from overloads and short. Solera's surface-mounted boxes provide durable protection for electrical installations in industrial environments. 3 to 15 modules: Wide range of sizes for all setups. This small distributor is suitable for surface mounting. Can be used in wet rooms, basements, garages and all indoor areas. The enclosure is made of galvanized steel coated with a durable polyester powder finish, ensuring resistance to corrosion, moisture, and mechanical impact.
