

Telecommunication Tower Relocation Project

Overview

The Posts and Telecommunications Regulatory Authority of Zimbabwe (POTRAZ) has funded the relocation of 11 telecoms network towers across the country to improve network coverage and capacity, particularly in areas where demand is highest or with higher population density. Why Tower Relocation Has Become a Major Legal Flashpoint Telecom towers are critical infrastructure, but they are also frequent sources of dispute. Relocation demands arise due to road widening, metro and infrastructure projects, redevelopment of private property, safety concerns, or objections. Preparing new development sites for residential, commercial, industrial, governmental, or any other special purpose or public use (Land Developer). Constructing and renovating of buildings (Building Developer). A telecom service provider licensed by the Commission. Refers to an agreement concluded. COMM TREND CONSTRUCTION CORPORATION (CTCC) was established in 2001 as a response to the ever growing needs of vital players in the Telecommunications Industry. In keeping with the nation's bid for active participation in the global market, CTCC is an important contributor to providing faster access. BHC coordinates and designs telecom relocation plans driven by city capital improvement projects and private development. BHC represents clients at utility coordination meetings to confirm routing, identify conflicts, and align solutions with project constraints.
