

US Manufacturer of Smart Building Distribution Boxes

Overview

Here are six brands that are great in 2025: Schneider Electric uses smart technology for better control. DOHO Electric makes designs that save energy. Legrand has stylish and modular systems. Rockwell Automation gives strong digital integration. ONESTOP ELECTRIC MANUFACTURER offers. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation. Among our distribution boxes you will find the smart and practical solution for your project or business. From power and signal distribution to I&C applications and complete room. Expanding the Savant smart power product lineup from the electrical panel to the equipment rack and beyond, the Savant Smart PDUs and UPS devices are the first ever to incorporate Savant's award-winning Power Module technology that precisely reports and manages energy consumption. For building owners, architects, construction managers, facilities engineers, and network. Chances are, the electrical setup was a maze of extension cords snaking across the ground, fuse boxes that tripped at the slightest overload, and electricians spending hours troubleshooting why the power went out in the third-floor west wing. It wasn't just inefficient—it was risky. Overloaded. The Romex® Brand SmartBox™ Original Device Boxes excel in versatility, especially in new work locations where hammer swinging is limited or where final wall surfaces are uncertain, such as kitchens and baths. Their superiority is evident in old or retrofit work scenarios because they are. Factories in Lexington, USA, Le Vaudreuil, France, and Hyderabad, India have been recognized as Sustainability Lighthouses, three of only 17 worldwide.
