

What level of waterproof and fireproof rating does the distribution box have

Overview

Low voltage distribution box outdoor use requires IP65 or NEMA 4X ratings, corrosion-resistant materials, and proper sealing for lasting weather protection. A NEMA rating is a standard established by the National Electrical Manufacturers Association that defines how well an electrical enclosure protects internal components from environmental conditions such as dust, water, and corrosion. NEMA ratings are commonly used in the United States and apply to. SMICO's IP65 protection rating is one of the common protection rating standards for outdoor plastic distribution boxes. Its polycarbonate/ABS enclosure and smoked PC viewing door protect devices while allowing quick breaker checks. Every unit includes a factory-fitted DIN rail plus knock-out entries that. The IP rating, defined by the IEC 60529 standard, uses two numbers: The first digit represents protection against solids (dust, dirt, contact). Need custom sizing or bulk order?
