

What router should I use for Dominic fiber optic internet

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. In this guide, I'll share my hands-on experience with the top routers that maximize fiber performance without breaking the bank. Future-proofing improves network longevity since Wi-Fi 6E and Wi-Fi 7 routers. Popular internet service providers (ISPs) such as Cox, Spectrum, Xfinity, and fiber-optic providers like AT&T offer faster Internet speeds for expansive home WiFi networks. Owning your router, modem router combo, or mesh WiFi system can help you take full advantage of your Internet plan and even.
