

Wholesale prices of domestically produced household electrical distribution boxes

AI Overview

Wholesale prices for household electrical distribution boxes typically range from \$10 to \$50 per unit, depending on type, specifications, and order volume.

Pricing Overview

The cost of domestically produced household electrical distribution boxes varies based on size, material, number of circuits, and safety certifications. Standard residential distribution boxes for indoor use generally start around \$10–\$20 per unit for basic models, while larger or modular boxes with advanced features such as IP-rated enclosures, multiple circuit breakers, or custom busbar configurations can range from \$30–\$50 per unit when purchased in bulk.

Factors Affecting Wholesale Prices

Order Volume: Larger orders often receive significant per-unit discounts. Bulk purchases of 100+ units can reduce costs substantially compared to small orders.

Specifications: Boxes with higher amperage ratings, additional compartments, or specialized materials (e.g., fire-resistant plastics or metal enclosures) are priced higher.

Certifications: Compliance with NEMA, IEC, or local electrical standards can influence pricing, as certified boxes may cost more but ensure safety and regulatory compliance.

Customization: OEM or custom branding, cable entry modifications, and modular designs can increase unit costs but are often available at wholesale rates for large orders.

Supplier Options

Domestic wholesalers and distributors: Companies like Curley Wholesale Electric offer a variety of NEMA-approved enclosures and electrical boxes at wholesale prices suitable for residential use.

Factory-direct manufacturers: Domestic factories may provide direct pricing for bulk orders, often with options for custom layouts, modular designs, and IP-rated enclosures.
