

Yin-Yang type optical attenuator

Overview

Yin And Yang Type Fiber Optic Fixed Attenuator is one end of the connector type and the other end of the adapter type, and the attenuation value is adjustable. This range of fixed attenuator is mainly used to reduce optical power to target. Jumping attenuator used in radar anti-interference: It is a variable attenuator with a sudden change in attenuation. It does not introduce attenuation normally, but suddenly increases attenuation when encountering external interference. From the perspective of microwave networks, an attenuator is a. The utility model discloses an SC yin-yang type optical attenuator with high return loss and high accuracy. One end is a flange access mode, and the other. ZGTECH is proud to introduce our innovative YIN-YANG attenuators, designed to meet the precise needs of optical communication systems. The LC fiber attenuator is in.
